How are Genesee Fire Rescue & Highland Rescue preparing for and responding to COVID 19?

- Jeffcom dispatchers are screening 911 callers for patients with related symptoms.
- If they suspect COVID 19, responders will try to limit exposure by initially utilizing only 1 caregiver/responder.
- Expect to see this initial caregiver dressed in extensive personal protective equipment (gloves, eye protection, mask, & gown)
- If transport to the hospital is required, responders will then take additional precautions to prepare the ambulance as an isolation area.
- The hospital will be notified early so they can prepare appropriately.
- The ambulance will then immediately receive decontamination procedures.
